PT Use of mechano-growth factor, an isoform of Insulin-like Growth

PT Factor-I, capable of reducing motoneurone loss, in the manufacture of a

PT medicament for the treatment of neurological disorder -

XX

PS Claim 4; Page 52; 66pp; English.

XX

CC The present invention relates to use of mechano-growth factor (MGF),

CC an Insulin-like Growth Factor-I (IGF-I) isoform in the manufacture of a

CC medicament for the treatment of neurological disorder. The MGF is capable

CC of reducing motoneurone loss by 20% or greater in response to nerve

CC avulsion, and effects motoneurone rescue, preferably adult motoneurone

CC rescue. The MGF polynucleotide and polypeptide are useful in the

CC manufacture of a medicament for the treatment of a neurological disorder,

CC including a disorder of motoneurons and/or neurodegenerative disorder,

CC e.g., amyotrophic lateral sclerosis, spinal muscular atrophy, progressive

CC spinal muscular atrophy, infantile or juvenile muscular atrophy,

CC poliomyelitis or post-polio syndrome, a disorder caused by exposure to a

CC toxin, motoneurone trauma, a motoneurone lesion or nerve damage, an

CC injury that affects motoneurons, motoneurone loss associated with aging,

CC autosomal or sex-linked muscular dystrophy, diabetic neuropathy,

CC peripheral neuropathies, Alzheimer's disease and Parkinson's disease.

CC The present sequence is rat IGF-I isoform MGF. MGF is a muscle

CC isoform having extracellular (Ec) domain, hence also referred as
CC IGF-I-Ec. The MGF protein comprises amino acid sequences encoded by
CC nucleic acid sequence of IGF-I exons 4, 5 and 6 in the reading frame
CC of MGF.

PT Use of insulin-like growth factor I (IGF-I) isoform known as
PT mechano-growth factor which is encoded by IGF-I exons 4,5,6 and has
PT ability to reduce motoneuron loss in response to nerve avulsion, to
PT treat nerve damage -

XX
 PS Claim 11; Fig 6; 65pp; English.
 XX
 CC The invention relates to the use of an insulin-like growth factor I
 CC (IGF-I) isoform, known as mechano-growth factor (MGF), in the manufacture
 CC of a medicament for treating nerve damage in the peripheral nervous
 CC system, or for treating nerve damage by localising MGF at the site of
 CC damage. The nerve damage may include severing of a nerve. The treatment
 CC may be combined with another treatment (such as a polypeptide growth
 CC factor other than MGF) that prevents or diminishes degeneration of the
 CC target organ (for example, muscle) which the damaged nerve innervates,
 CC whereby the treatment of the muscle with MGF or a polynucleotide encoding
 CC MGF prevents or diminishes degeneration. The method is useful for
 CC treating neurological disorders, preferably motoneuron disorders. These
 CC methods can reduce motoneuron loss by 20% or greater in response to nerve
 CC avulsion. This sequence represents the rat MGF polypeptide.

PT Use of insulin like growth factor I characterised by presence of Ec
 PT peptide - to treat humans or animals, particularly muscle disorders,
 PT heart conditions or neuromuscular diseases

XX

PS Disclosure; Fig 3; 33pp; English.

XX

CC A use of insulin like growth factor I (IGF-1) has been developed, and
CC is characterised by the presence of the Ec peptide, or a functional
CC equivalent, in the treatment or therapy of a human or animal. The IGF-1
CC polypeptide can be used to treat muscular disorders, e.g. Duchenne or
CC Becker muscular dystrophy, autosomal dystrophies and related progressive
CC skeletal muscle weakness and wasting, muscle atrophy in ageing humans,
CC spinal cord injury induced muscle atrophy and neuromuscular diseases,
CC and cardiac disorders, e.g. diseases where promotion of cardiac muscle
CC protein synthesis is a beneficial treatment, cardiomyopathies and acute
CC heart failure or insult, specifically myocarditis or myocardial
CC infarction. It can also be used to promote bone fracture healing and
CC maintenance of bone in old age. The present sequence represents rabbit
CC IGF-1 used in the present specification.

PT Use of mechano-growth factor, an isoform of Insulin-like Growth
PT Factor-I, capable of reducing motoneurone loss, in the manufacture of a
PT medicament for the treatment of neurological disorder -

XX

PS Claim 4; Page 50-51; 66pp; English.

XX

CC The present invention relates to use of mechano-growth factor (MGF),
CC an Insulin-like Growth Factor-I (IGF-I) isoform in the manufacture of a
CC medicament for the treatment of neurological disorder. The MGF is capable
CC of reducing motoneurone loss by 20% or greater in response to nerve
CC avulsion, and effects motoneurone rescue, preferably adult motoneurone
CC rescue. The MGF polynucleotide and polypeptide are useful in the
CC manufacture of a medicament for the treatment of a neurological disorder,
CC including a disorder of motoneurons and/or neurodegenerative disorder,
CC e.g., amyotrophic lateral sclerosis, spinal muscular atrophy, progressive
CC spinal muscular atrophy, infantile or juvenile muscular atrophy,
CC poliomyelitis or post-polio syndrome, a disorder caused by exposure to a
CC toxin, motoneurone trauma, a motoneurone lesion or nerve damage, an
CC injury that affects motoneurons, motoneurone loss associated with aging,
CC autosomal or sex-linked muscular dystrophy, diabetic neuropathy,
CC peripheral neuropathies, Alzheimer's disease and Parkinson's disease.
CC The present sequence is human IGF-I isoform MGF. MGF is a muscle
CC isoform having extracellular (Ec) domain, hence also referred as
CC IGF-I-Ec. The MGF protein comprises amino acid sequences encoded by
CC nucleic acid sequence of IGF-I exons 4, 5 and 6 in the reading frame
CC of MGF.

 XX
 PS Claim 11; Fig 5; 65pp; English.
 XX
 CC The invention relates to the use of an insulin-like growth factor I
 CC (IGF-I) isoform, known as mechano-growth factor (MGF), in the manufacture
 CC of a medicament for treating nerve damage in the peripheral nervous
 CC system, or for treating nerve damage by localising MGF at the site of
 CC damage. The nerve damage may include severing of a nerve. The treatment
 CC may be combined with another treatment (such as a polypeptide growth
 CC factor other than MGF) that prevents or diminishes degeneration of the
 CC target organ (for example, muscle) which the damaged nerve innervates,
 CC whereby the treatment of the muscle with MGF or a polynucleotide encoding
 CC MGF prevents or diminishes degeneration. The method is useful for
 CC treating neurological disorders, preferably motorneuron disorders. These
 CC methods can reduce motoneuron loss by 20% or greater in response to nerve
 CC avulsion. This sequence represents the human MGF polypeptide.

XX

CC A 42 base oligonucleotide corresponding to the DNA sequence encoding
CC amino acids 10 to 23 of mature human IGF-I was synthesized (AAN70437).
CC The radiolabeled 42 mer was then employed to screen for IGF-I
CC containing DNA sequences in a human liver cDNA library. Insulin-
CC like growth factors-1A and -1B cDNAs were isolated from a human cDNA
CC library by using lambdagt 11 (AAN70435, AAN70436). The human IGF-1
CC genomic gene was isolated and mapped. It encodes at least two
CC preproinsulin-like growth factor-1 proteins. An essentially pure
CC preproinsulin-like growth factor-1 protein comprising the sequence
CC of amino acids shown in Figure six is claimed (AAP70277).

 PT Regulating memory consolidation in an animal comprising treating with
 PT an agent that modulates activity of one or more genes from zif268,
 PT insulin-like growth factor, glutamate receptor 2, c/EBPbeta and VGF -
 XX
 PS Disclosure; Page 90-91; 100pp; English.
 XX
 CC The invention relates to modulating long term memory consolidation in an
 CC animal comprises treating with an agent that modulates the activity of
 CC one or more of genes from zif268, insulin-like growth factor (IGF),
 CC glutamate receptor 1 (GluR1), glutamate receptor 2 (GluR2), c/EBPbeta
 CC and neuroendocrine VGF (neurotrophin-inducible gene). The method is useful
 CC for identifying an agent which modulates memory consolidation. The method
 CC is useful for conducting a drug and/or target discovery business, which
 CC comprises conducting therapeutic profiling of the agents (or their
 CC analogues) identified, for efficacy and toxicity in animals, and
 CC formulating a pharmaceutical preparation including one or more agents
 CC identified as having an acceptable therapeutic profile and/or licensing
 CC to a third party the rights for further drug development of the
 CC identified agents. The method of conducting drug discovery business
 CC further comprises an additional step of establishing a distribution
 CC system for distributing the preparation for sale and may optionally
 CC include establishing a sales group for marketing the preparation. A
 CC pharmaceutical composition containing the agent is useful for enhancing
 CC memory consolidation in an animal, or for augmenting learning and memory,
 CC or otherwise for enhancing the functional performance of central nervous
 CC system neurons, where the agent is a cAMP elevating agent (agonist)
 CC preferably a cAMP analogue or cAMP phosphodiesterase inhibitor, which
 CC activates adenylate cyclase. The composition is useful for treating
 CC diseases associated with learning disabilities, memory impairment e.g.
 CC due to toxicant exposure, brain injury, epilepsy, mental retardation in
 CC children and senile dementia, including Alzheimer's disease. The
 CC present sequence represents human insulin-like growth factor, IGF1.

Pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.

RESULT 15
S22878
insulin-like growth factor I precursor, splice form 2 - sheep
C;Species: Ovis orientalis aries, Ovis ammon aries (domestic sheep)
C;Date: 23-Apr-1999 #sequence_revision 23-Apr-1999 #text_change 23-Jul-1999
C;Accession: S22878; S07198
R;Dickson, M.C.; Saunders, J.C.; Gilmour, R.S.
J. Mol. Endocrinol. 6, 17-31, 1991
A;Title: The ovine insulin-like growth factor-I gene: characterization, expression and identification of a putative promoter.
A;Reference number: S22877; MUID:91197361; PMID:2015053
A;Accession: S22878
A;Status: preliminary
A;Molecule type: DNA
A;Residues: 1-138 <DIC>
A;Cross-references: EMBL:X51358
R;Francis, G.L.; McNeil, K.A.; Wallace, J.C.; Ballard, F.J.; Owens, P.C.
Endocrinology 124, 1173-1183, 1989

A;Title: Sheep insulin-like growth factors I and II: sequences, activities and assays.

A;Reference number: S07198; MUID:89136887; PMID:2537174

A;Accession: S07198

A;Molecule type: protein

A;Residues: 34-103 <FRA>

A;Experimental source: fetal plasma

C;Genetics:

A;Introns: 5/3; 59/1; 119/3

C;Superfamily: insulin

C;Keywords: alternative splicing; growth factor; plasma

F;7-33/Domain: propeptide #status predicted <PRO>

F;34-103/Product: insulin-like growth factor I (active) #status experimental <MAT>

F;34-62/Domain: insulin chain B-like #status predicted <DOB>

F;63-74/Domain: insulin connecting peptide-like #status predicted <CHC>

F;75-95/Domain: insulin chain A-like #status predicted <DOA>

F;96-103/Domain: peptide D #status predicted <CHD>

F;104-138/Domain: carboxyl-terminal propeptide (E peptide) #status predicted <CTP>

F;39-81,51-94,80-85/Disulfide bonds: #status predicted

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

 DE Insulin-like growth factor I precursor (IGF-I) (Somatomedin)
 DE (Fragment).
 GN IGF1.
 OS Coturnix coturnix japonica (Japanese quail).
 OC Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi;
 OC Archosauria; Aves; Neognathae; Galliformes; Phasianidae; Phasianinae;

OC Coturnix.
 OX NCBI_TaxID=93934;
 RN [1]
 RP SEQUENCE FROM N.A.
 RX MEDLINE=95187621; PubMed=7881819;
 RA Kida S., Iwaki M., Nakamura A., Miura Y., Takenaka A., Takahashi S.,
 RA Noguchi T.;
 RT "Insulin-like growth factor-I messenger RNA content in the oviduct of
 RT Japanese quail (*Coturnix coturnix japonica*): changes during growth
 RT and development or after estrogen administration.";
 RL Comp. Biochem. Physiol. 109C:191-204(1994).
 CC -!- FUNCTION: THE INSULIN-LIKE GROWTH FACTORS, ISOLATED FROM PLASMA,
 CC ARE STRUCTURALLY AND FUNCTIONALLY RELATED TO INSULIN BUT HAVE A
 CC MUCH HIGHER GROWTH-PROMOTING ACTIVITY.
 CC -!- SUBCELLULAR LOCATION: Secreted.
 CC -!- SIMILARITY: BELONGS TO THE INSULIN/IGF/RELAXIN FAMILY.
